Outdoor Cake Display Form

For customers who intend to display their cake outdoors

Outdoor Event Form

Important instructions for displaying your cake outdoors

- ▶ Cakes should never be displayed in direct sunlight or anywhere sunlight might eventually move. It is imperative that your outdoor dessert display area offers adequate shelter from the sun (tent or porch covering). Please arrange this in advance with your event coordinator or person in charge of the event.
- ▶ Cakes are safest when they are displayed against a wall. If possible, consider arranging the cake table up against the wall of a house or side of a tent.
- ▶ Make sure to display the cake on a stable and level surface that is at least four feet off the ground.
- ▶ Please prepare a back-up location for displaying the cake in case of inclement weather.

Outdoor Event Disclaimer

I have opted for my cake to be displayed outdoors. I understand that an outdoor environment is less suitable for cake and may expose the cake to insects, damage, or debris.

I acknowledge that [your bakery name here] cannot be held liable for damage on a cake that is displayed outdoors since natural outdoor conditions such as heat, wind, humidity, or un-level ground can weaken or ruin the infrastructure and/or decorations on a cake.

By requesting to have my cake displayed outdoors, I waive my right to dispute problems related to structural weakness, insects/debris, or damage to the outside of the cake.
